

PLANETPRESS CAPTURE

A NEW AND UNIQUE ALTERNATIVE TO SCANNING TRANSACTIONAL DOCUMENTS

PlanetPress Capture allows PlanetPress Production users to capture signatures and changes on transactional documents.

Why PlanetPress Suite?

- Ability to produce highly conditional transactional documents
- Designed for distributed and production print
- Ability to print "capture enabled regions" only where needed on the form - Save significantly on toner
- Eliminates scanning of transactional documents
- WYSIWYG workflow tool
- All this can be done without custom development

The Applications

Whether the need to capture signatures and handwritten changes occurs on-site or out in the field, PlanetPress Capture is the answer.

On-site forms:

- Bills of Lading
- Pick Tickets
- Rental Contracts
- Employment Application Forms

Field Based forms:

- Proof of Delivery (POD)
- Service Work Orders
- Inspection Forms
- Sales orders and contracts

Once the information is sent to the host server, the signature and handwritten information will be applied to the final version of the original document. The digital document can then be sent by email or fax, even archived in a document management system. For applications requiring signature verification, a clerk can validate the information using our document viewer.

The Benefits

Increase Productivity

- Eliminate paper document scanning and reduce data entry
- Capture and validate signatures in real time
- Trigger business processes based on pen strokes
- Automatically process documents based on business rules

Cost efficiency

- Eliminate costly scanning processes
- Reduce overhead by utilizing existing print output from legacy systems
- Secure, high quality information capture and processing: removes costly correction routines and reduces risks for errors
- Reduce print volume

Ease of use

- Virtually the same data gathering method you currently use, pen and paper
- Requires no changes to work routines or existing processes
- Natural face-to-face interaction without intrusive computers
- Necessitates very little user training

Learn more

PlanetPress Suite

Whether documents require signatures or handwritten information, they have one thing in common: their creation, processing and distribution are expensive. With the PlanetPress Suite, you have a single and affordable solution to create, modify and workflow your documents and forms.
